📁 Portfolio

Profile Summary

System Support Engineer with hands-on experience in enterprise IT infrastructure, networking, technical support, and business intelligence. Skilled in **Power BI, Snowflake, Python, Docker, ITIL 4, React Native, TensorFlow, and Apache Superset**. Passionate about using analytics and automation to improve operational efficiency and business decision-making. Currently pursuing an MSc in Business Intelligence and Analytics.

Education

Teesside University

MSc in Business Intelligence and Analytics

United Kingdom

2026 – Present

University of Sri Jayewardenepura

BSc (Special) Computer Science | CGPA: 3.30

Sri Lanka

2021 – 2025

Experience

System Support Engineer – Service Delivery & Compliance

Millennium IT ESP | Managed Infrastructure Services

May 2026 – Present

Sri Lanka

- Assigned to the **Service Delivery and Compliance** team within Managed Infrastructure Services, supporting enterprise client engagements through performance monitoring, reporting and analytics.
- Designed and developed interactive **Power BI** and **Apache Superset** dashboards to monitor project KPIs, service performance and operational metrics.
- Provided analyst support for enterprise clients including **Onsys Pty Ltd, Dole Asia** and **South Asia Gateway Terminals (SAGT)**.
- Collaborated with cross-functional teams to deliver actionable insights, improve reporting accuracy and support data-driven decision making.

Technologies: Power BI • Apache Superset • Dashboard Design • Reporting • Data Analytics • Business Intelligence

System Support Engineer

Millennium IT ESP | Honeylight Consulting (Australia)

May 2025 – April 2026

Australia

- Deputed as a Systems Support Engineer under a Managed Services engagement, responsible for day-to-day administration of the client's enterprise IT infrastructure.
- Administered Windows systems, enterprise networks and firewall environments while maintaining high system availability.
- Managed IT infrastructure and service delivery activities aligned with **ITIL 4** best practices.
- Performed incident identification, troubleshooting, root cause analysis and end-to-end incident resolution.
- Configured and maintained **HPE Aruba** networking infrastructure across the client environment.
- Provided Network Operations Centre (NOC) support through **PRTG** monitoring, alert management and escalation.
- Managed daily Systems and Platform Administration (SPA) operational checklists to ensure infrastructure health and compliance.

Technologies: HPE Aruba • PRTG • Windows Server • Network Administration • Firewall Administration • ITIL 4 • Incident Management

Associate Systems Support Engineer Intern

Millennium IT ESP | AIA Insurance Sri Lanka

September 2024 – April 2025

Sri Lanka

- Provided first-line technical support within a managed services environment, resolving hardware, software and network-related incidents.
- Diagnosed root causes and resolved L1/L2 technical issues while maintaining SLA compliance.
- Installed, configured and maintained desktop systems, operating systems, software applications and peripheral devices.
- Supported deployment and configuration of laptops, desktops and mobile devices across the enterprise environment.
- Managed Active Directory user accounts, access permissions and security compliance.
- Handled IT service requests through **ServiceNow** across email, phone and ticketing platforms.
- Maintained IT asset inventory, endpoint security and software licensing records.
- Escalated complex incidents to L2/L3 infrastructure teams while ensuring timely issue resolution.

Technologies: ServiceNow • SCCM • Microsoft Intune • CrowdStrike • Forcepoint • BitLocker • Active Directory • ITSM

Projects

X-Ray Information System: Deep Neural Network Approach

 Research Paper | [Live Demo](#)

Designed and developed an AI-powered clinical decision support system for automated bone fracture detection from musculoskeletal X-ray images. Trained a **ResNet50** deep learning model on the **MURA v1.1** dataset (~40,000 radiographs), achieving **83%** body-part classification accuracy and **81%** fracture detection accuracy. Integrated the model into a **Flask REST API** and a **React Native** mobile application for real-time diagnosis support.

Technologies: Python • TensorFlow/Keras • OpenCV • Flask • React Native • Docker • Google Colab • Git

Hand-Gesture-Controlled Tetris Game (Tetra Thrill)

 GitHub | [Live Demo](#)

Developed a gesture-controlled version of the classic Tetris game to demonstrate Human-Computer Interaction principles through real-time computer vision. Implemented hand landmark detection using **MediaPipe** and integrated gesture recognition with **OpenCV** and **Pygame** to provide an intuitive, touch-free gaming experience.

Technologies: Python • OpenCV • MediaPipe • Pygame • Git

Kaleidoscope Snowflake Generator (Snow KaleidoCraft Studio)

 GitHub | [Live Demo](#)

Built an interactive browser-based creative coding application that generates unique, symmetrical snowflake patterns using procedural drawing techniques. Implemented real-time parameter manipulation and mathematical symmetry using the **p5.js** graphics library to explore generative art concepts.

Technologies: JavaScript • p5.js • HTML5 • CSS3

Sinhala Literature Book Store Management System

 GitHub | [Live Demo](#)

Designed and developed a full-stack bookstore management system to streamline inventory management, order processing, and customer book browsing. Built responsive user interfaces and integrated a **PHP-MySQL** backend for efficient data management as part of the CSC 364 Seminar II coursework.

Technologies: PHP • MySQL • XAMPP • HTML5 • CSS3 • JavaScript • Git

Technical Skills

Infrastructure: System Administration • Active Directory • Networking • Firewalls • Aruba • PRTG • SCCM • Intune

Business Intelligence: Power BI • Snowflake • Apache Superset • Data Visualization • Analytics

Programming: Python • PHP • JavaScript • HTML5 • CSS3 • MySQL • Flask • React Native

AI/ML: TensorFlow • OpenCV • Docker • Machine Learning • Deep Learning

Soft Skills: Leadership • Communication • Teamwork • Critical Thinking • Problem Solving

Certifications

Google Project Management Professional Certificate

Issued by: Google Career Certificates

June 2026

Completed Google's professional program covering the complete project lifecycle, including project planning, Agile and Scrum methodologies, stakeholder communication, risk management, scheduling, budgeting, and project documentation. Developed practical experience using industry-standard project management tools and best practices.

Credential ID: DYU2GD9B153V

ITIL 4 Foundation

Issued by: Logical Operations

May 2026

Earned the ITIL 4 Foundation certification, demonstrating knowledge of modern IT Service Management (ITSM), the ITIL service value system, incident management, service delivery, continual improvement, and IT best practices aligned with business objectives.

Credential ID: B18K9T6BSMF7

Snowflake Data Engineering Professional

Issued by: Snowflake

May 2026

Validated expertise in cloud-based data engineering, including data ingestion, transformation, ELT pipelines, Snowflake architecture, data warehousing, SQL optimization, and scalable analytics solutions.

Credential ID: I9ZNY155YT1

Fundamentals of Predictive Project Management

Issued by: Project Management Institute (PMI)

April 2026

Completed professional training covering predictive project management methodologies, project planning, scheduling, scope management, budgeting, risk management, and project execution based on PMI best practices.

Professional Badge: KICKOFF
